# FLOWERS + PLANTS

**ALMOST HALF OF THE WORLD'S  
BLUEBELLS CAN BE FOUND IN  
THE UK!**

# REPTILES + AMPHIBIANS

REPTILES CANNOT PRODUCE HEAT LIKE  
WE HUMANS CAN, THEY HAVE TO BASK IN  
THE SUN TO WARM UP!

# MAMMALS

THE OLDEST BAT THAT WAS EVER FOUND  
WAS A 41-YEAR OLD BRANDT'S BAT.

Home Farm Glamping are donating £3 for every booking to Herts and Middlesex Wildlife Trust, a local conservation charity, here to help you explore the countryside and care for nature.

Together we have created this Nature Diary for you to log what you discover during your glamping stay at Home Farm.

See how many bees, moths, herons, red kites, hedgehogs, hares, field mice, shrews and voles you can spot. You may even see fish and pond skaters in our lake!

Draw, make notes and write poems to remind yourself of the wildlife at Home Farm. Maybe you'll find them in the wild places near your home too?

Remember to take care near water and allow wildlife to thrive... do not pick things like wild flowers (please leave them for the bees to enjoy instead).

Why not upload photos of your Nature Diary and ask a grown-up to tag us in on social media? #GoWildHFG

Please follow us on social media and join the Trust online.
